PROFESSIONAL PROFILE

Computer Engineering student with a versatile technical profile integrating software development, data engineering, and cybersecurity. I have practical experience leading deployments in the financial sector and developing End-to-End solutions that combine modern architectures (React/Node.js) with artificial intelligence and regulatory compliance. I seek to contribute a comprehensive vision of the software lifecycle, from cloud infrastructure to data analysis.

TECHNICAL SKILLS

- **Development:** Python, JavaScript/TypeScript, React, React Native, Node.js, Java (Spring Boot).
- **Data & AI:** SQL, ETL (Pentaho/DataStage), Pandas, TensorFlow, YOLOv8, Computer Vision.
- **Infra & Cloud:** AWS (Certified), Docker, Terraform (IaC), CI/CD, Linux.
- **Security:** OWASP Top 10, Hardening, Vulnerability Analysis, PCI-DSS, Auth (JWT/OAuth).
- **Languages:** Spanish (Native), English (C1 - Advanced).

WORK EXPERIENCE

Delivery Manager Jr. | Red Link November 2024 – Present

- Lead the technical coordination of deployments and migrations for over 10 banking entities, managing environments and resolving blockers in distributed architectures.
- Use SQL and Power BI to analyze team performance metrics and business KPIs, optimizing strategic decision-making.

Information Security Intern | Red Link May 2023 – November 2024

- Executed vulnerability analysis and server hardening for critical servers, collaborating with infrastructure teams to mitigate risks prior to audits.
- Automated compliance controls (PCI-DSS) using Python scripts, reducing the operational load of the IT Governance team.

Business Intelligence Intern | Efectivo Sí July 2022 – May 2023

- Designed ETL pipelines with **Pentaho** and **IBM DataStage** to integrate large volumes of financial data.
- Developed Python scripts for data cleaning and exploratory analysis, improving information quality for management reports.

FEATURED PROJECTS (Portfolio)

SensAi | Computer Vision & Edge AI (Data + Mobile) Mobile assistance app for visually impaired people.

- **Achievement:** Trained and deployed object detection models (YOLOv8) optimized for mobile (ONNX), achieving real-time inference (~50ms) offline.
- **Technologies:** Python, TensorFlow, Kotlin, Android, Label Studio.

Tribe | Secure Social Network (Full Stack + Security) Social platform with gamification and robust authentication.

- **Achievement:** Designed a secure microservices architecture, implementing native biometric authentication and protection against common attacks (XSS, NoSQL Injection) by design.
- **Technologies:** React Native, Node.js, MongoDB, JWT, Biometrics.

Deliver.ar | Cloud Infrastructure (DevOps) Marketplace with automated deployment.

- **Achievement:** Implemented the full infrastructure on AWS using Terraform (IaC) and CI/CD pipelines, ensuring reproducible and scalable environments.
- **Technologies:** AWS, Terraform, Docker, Java Spring Boot, React.

EDUCATION

Computer Engineering | UADE 2020 – In progress (45 courses completed)

Systems Analyst | UADE Completed (2023)

CERTIFICATIONS

AWS Academy Cloud Foundations | Amazon Web Services (2024)
